

RAVI KUMAR

Pittsburg, CA | (925) 597-8128 | ravikus1457@gmail.com | LinkedIn: [linkedin.com/in/ravik1457](https://www.linkedin.com/in/ravik1457)

PROFESSIONAL SUMMARY

Cloud and Network Engineering professional with hands-on experience designing, configuring, and supporting enterprise network infrastructure and cloud-connected environments. Proven expertise in core networking protocols (TCP/IP, DNS, DHCP), Site-to-Site VPN deployments, and cloud infrastructure integration. Strong background in Linux administration, PowerShell automation, and log analysis to optimize system performance and security. Skilled at collaborating with engineering teams to resolve complex technical infrastructure issues and scale modern environments.

CORE COMPETENCIES

Cloud & Infrastructure: AWS (VPC, EC2, Security Groups), VPN Architecture, Identity Management (Active Directory, Azure AD)

Networking & Security: TCP/IP, DNS, DHCP, LAN/WAN, Firewalls, Network Security & Compliance

Systems & Automation: Linux Administration (Ubuntu/CLI), PowerShell Scripting, Systems Validation, MDM Tools

Operations & Diagnostics: Log Analysis, Root Cause Troubleshooting, Remote Infrastructure Diagnostics, Technical Documentation

PROFESSIONAL EXPERIENCE

Information Systems Technician | Contra Costa County Department of Public Works

Nov 2025 – Present (Martinez, CA)

Network Infrastructure Support: Troubleshoot complex network connectivity issues, including DNS, DHCP, Active Directory authentication, and VPN routing across distributed county environments.

Systems Deployment & Project Management: Coordinate user data backups and schedule high-volume hardware refreshes via Microsoft Bookings, managing a deployment project of iPhone devices for 125 employees.

Automation & Identity Management: Utilize PowerShell scripting to manage, audit, and update Active Directory data, streamlining user onboarding and operational efficiency.

Root Cause Analysis: Analyze system logs and diagnostics to isolate infrastructure failures, implementing immediate configuration updates, patches, and optimizations to maintain environment stability.

Documentation: Author comprehensive technical procedures to support repeatable troubleshooting workflows and facilitate scalable infrastructure maintenance.

IT Support Technician II | Meta

Oct 2025 – Nov 2025 (Menlo Park, CA)

Enterprise Network Diagnostics: Diagnosed complex infrastructure issues involving networking, authentication, VPN connectivity, and system performance within a high-availability production environment.

Cross-Functional Collaboration: Partnered directly with engineering teams to resolve escalated, high-impact infrastructure and cloud-connected technical problems.

Endpoint & Systems Management: Supported enterprise Linux, macOS, and Windows endpoints; executed configuration, deployment, and automation using MDM tools to maximize operational readiness.

Cloud Operator | Bay Alarm

Apr 2024 – Jun 2025 (Concord, CA)

Cloud Device Monitoring: Proactively monitored and managed cloud-connected enterprise devices, ensuring consistent connectivity health and performance uptime.

Remote Connectivity: Configured network devices, validated system setups, and resolved complex remote connectivity issues using cloud management consoles.

IS&T Helpline Analyst | Apple Inc.

Feb 2023 – Jan 2024 (Elk Grove, CA)

Network Troubleshooting: Troubleshot authentication, networking, MDM profiles, and OS-related issues across large-scale networked environments.

TECHNICAL PROJECTS

Hybrid Cloud Infrastructure & Networking Lab (AWS & Raspberry Pi)

Designed and deployed a hybrid network infrastructure establishing a Site-to-Site VPN connecting a Raspberry Pi 5 home lab to an AWS VPC.

Configured and secured WireGuard VPN tunnels, managing underlying Linux CLI configurations, routing tables, and cryptographic keys.

Architected network security policy by configuring and auditing AWS Security Groups and local firewall access control lists (ACLs) to enforce least-privilege access control.

Managed active monitoring and log analysis across the VPN tunnel to troubleshoot traffic flow and optimize network throughput.

CERTIFICATIONS & EDUCATION

B.S. Cloud and Network Engineering – Western Governors University (In Progress)

CompTIA Security+ (04/2026)

CompTIA Network+ (02/2026)

Linux Essentials (02/2026)

CompTIA A+ (02/2026)

CompTIA ITF+ (06/2024)

IT Support Certificate – YearUp / Diablo Valley College (2024)
