PROFESSIONAL SUMMARY

Cloud and network infrastructure professional with 3+ years supporting enterprise and public-sector environments at Contra Costa County, Meta, Bay Alarm, and Apple. Hands-on experience with AWS, Terraform, Linux, PowerShell, Active Directory, DNS, DHCP, VPNs, and incident troubleshooting. Built a live AWS portfolio featuring five Terraform-defined labs, automated validation and teardown, and a hybrid Raspberry Pi-to-AWS WireGuard network.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS VPC, EC2, ALB, Auto Scaling, ECS Fargate, S3, IAM, CloudWatch, SNS, Site-to-Site VPN
IaC & Automation: Terraform, Bash, PowerShell, Git/GitHub, automated provisioning, validation, teardown
Networking & Security: TCP/IP, DNS, DHCP, routing, subnetting, VLANs, firewalls, ACLs, SSH, WireGuard, packet analysis
Systems & Identity: Linux (Ubuntu/CLI), Windows, macOS, Active Directory, Microsoft Entra ID, MDM, patch management
Operations: Log analysis, monitoring, root-cause analysis, incident triage, technical documentation, runbooks, ITIL 4 service management

SELECTED CLOUD & NETWORKING PROJECTS

AWS Infrastructure Labs | Terraform · AWS · Bash · Git

- Built a Terraform-based lab platform with a Bash runner that provisions infrastructure, validates it against live AWS APIs, captures evidence, and auto-destroys each environment for repeatable, near-zero idle-cost testing.
- Implemented five labs covering multi-AZ VPC networking, EC2 with ALB and Auto Scaling, least-privilege IAM with private S3, ECS Fargate, and CloudWatch dashboards, alarms, logs, and SNS notifications.

Hybrid Cloud Network | AWS VPC · WireGuard · Linux · Raspberry Pi 5

- Designed an encrypted site-to-site WireGuard tunnel between a Raspberry Pi home lab and an AWS VPC, configuring Linux peers, routing tables, cryptographic keys, security groups, and firewall ACLs.
- Used SSH, log analysis, and traffic validation to diagnose tunnel connectivity and document a reproducible hybrid-network architecture.

PROFESSIONAL EXPERIENCE

Information Systems Technician I | Contra Costa County, Dept. of Public Works - Martinez, CA Mar 2026 - Present

- Automate Active Directory account administration, audits, and updates with PowerShell across a distributed county environment.
- Diagnose DNS, DHCP, Active Directory authentication, and VPN routing failures; analyze logs, apply configuration and patch fixes, and author repeatable runbooks.
- Led an end-to-end iPhone deployment for 125 employees, coordinating user-data backups, Microsoft Bookings schedules, rollout support, and issue resolution.

Information Systems Specialist I | Contra Costa County, IT Dept. - Martinez, CA Nov 2025 - Mar 2026

- Provided County-wide information systems support, including account administration and endpoint configuration across departments.
- Diagnosed and resolved DNS, DHCP, Active Directory authentication, and connectivity issues for County staff.

Junior Infrastructure Support Engineer (Contract) | Meta - Menlo Park, CA Oct 2025 - Nov 2025

- Diagnosed network routing, DNS, VPN, authentication, and endpoint-performance issues in a high-availability production environment, partnering with engineering teams on escalations.
- Supported enterprise Linux, macOS, and Windows endpoints through MDM-driven configuration, validation, and troubleshooting.

Cloud Operator | Bay Alarm - Concord, CA Apr 2024 - Jun 2025

- Monitored cloud-connected enterprise devices for connectivity health and uptime; configured network devices and validated new and existing installations.
- Resolved complex remote-connectivity and configuration issues through cloud management consoles and structured troubleshooting.

IT & Network Operations Analyst | Apple Inc. - Elk Grove, CA Feb 2023 - Jan 2024

- Troubleshoot TCP/IP, DNS, DHCP, VPN, authentication, MDM profile, and operating-system issues across large-scale enterprise environments.
- Documented repeatable resolution workflows and escalated complex infrastructure incidents with clear technical findings.

CERTIFICATIONS & EDUCATION

Certifications: ITIL 4 Foundation in IT Service Management (2026) · CompTIA Security+ · Network+ · A+ · Linux Essentials · ITF+

In Progress: AWS Certified Solutions Architect - Associate · AWS Certified Cloud Practitioner

B.S., Cloud and Network Engineering - Western Governors University, in progress

IT Support Certificate - Year Up / Diablo Valley College, 2024
